

# Low Fidelity Prototype

## Mapping user story and low fidelity prototype

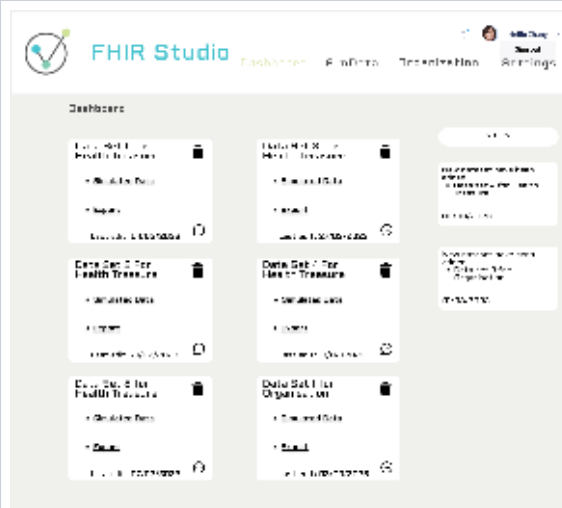

We will map each screen of our created low fidelity prototype with its corresponding user story from the [User Stories](#) in Confluence.

User Story	Screenshot
<ul style="list-style-type: none"><li>• E1.1 As an organization user, I want to register an account so that I can get an account that belongs to my organization.</li><li>• E1.2 As an organization user, I want to have a password so that I can log in to my account with my password, and I can reset it when I need.</li><li>• E1.3 As an organization user, I want to have my password confirmation (like repeat password when registering) so that I can verify my entered password to ensure it is right by entering it twice.</li></ul>	 <p><b>Create Account</b></p> <p>USER NAME</p> <p><input type="text" value="Muarrif"/></p> <p>EMAIL</p> <p><input type="text" value="Enter text here..."/></p> <p>ORGANIZATION</p> <p><input type="text" value="unimelb"/></p> <p>PASSWORD</p> <p><input type="password" value="••••••••"/></p> <p>CONFIRM PASSWORD</p> <p><input type="password" value="••••••••"/></p> <p><a href="#">SIGN UP</a></p> <p><small>By clicking Sign Up, you agree to our <a href="#">Terms</a>, <a href="#">Data Policy</a> and <a href="#">Cookie Policy</a>.</small></p> <p><small>Already have account? <a href="#">sign in</a></small></p>
<ul style="list-style-type: none"><li>• E2.1 As an organization user or personal user, I want to sign in so that I can use all the functionalities of FHIR Studio.</li></ul>	 <p><b>Welcome Back!</b></p> <p>USER NAME/EMAIL</p> <p><input type="text" value="validitron@gmail.com"/></p> <p>PASSWORD</p> <p><input type="password" value="••••••••"/></p> <p><input checked="" type="checkbox"/> Remember me</p> <p><a href="#">SIGN IN</a></p> <p><small><a href="#">Forgot password?</a></small></p> <p><small>Don't have account? <a href="#">register</a></small></p>

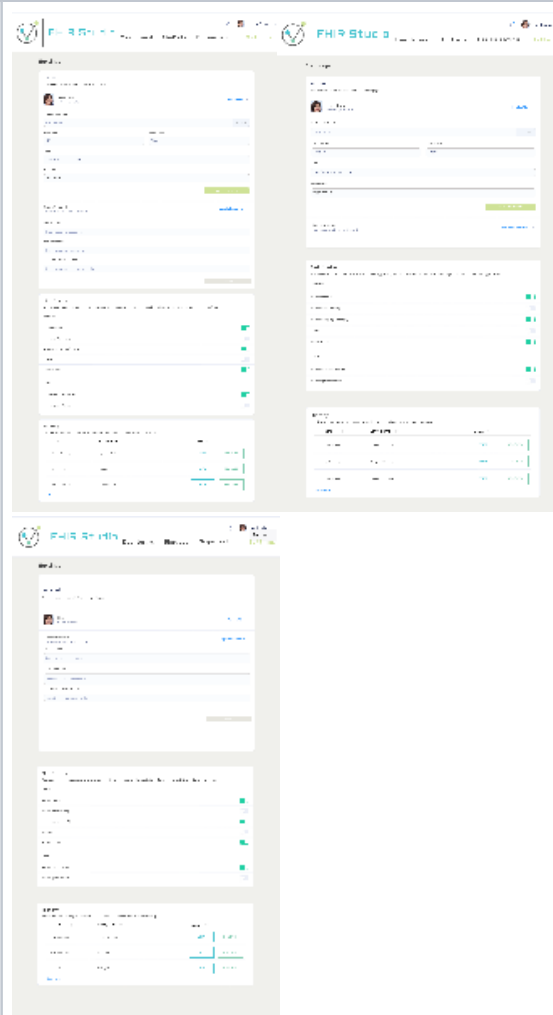

- E2.3 As an organization user or personal user, I want to sign out so that I can switch to another account on the same device / protect my data.

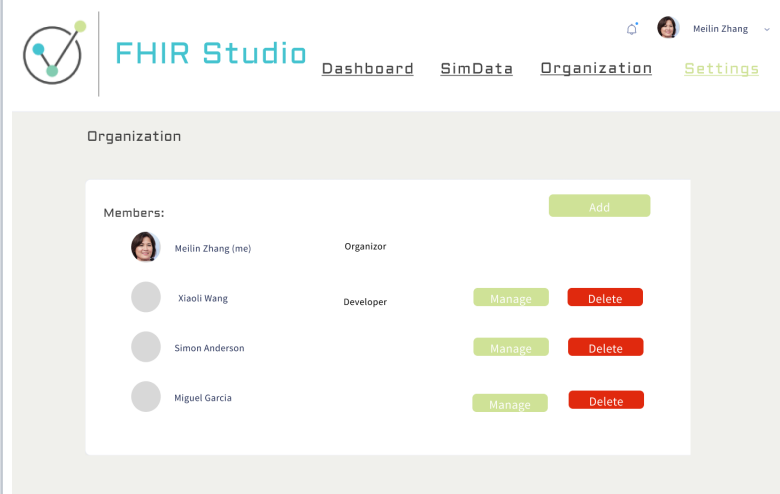

- E4.4 As a user, I want to view the overall data in the dashboard so that I can navigate my data and can access my data easily.
- E4.6 As a user, I want to export the simulated data so that I can do some analysis to support my decision.

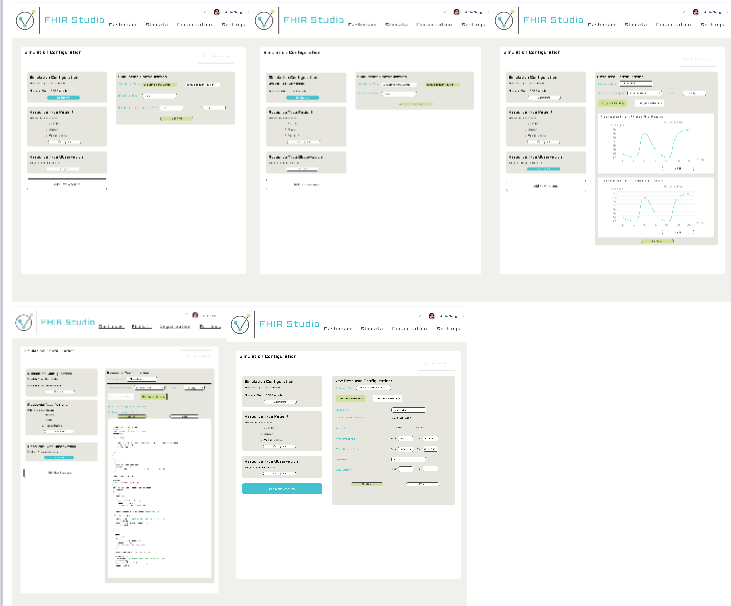

- E3.1 As a user, I want to view and edit the account information so that I can update my information anytime I want.
- E3.2 As a user, I want to receive notifications, requests to share data related to your activities on FHIR platform so that I can view the information notification method and adjust it to the way I want.

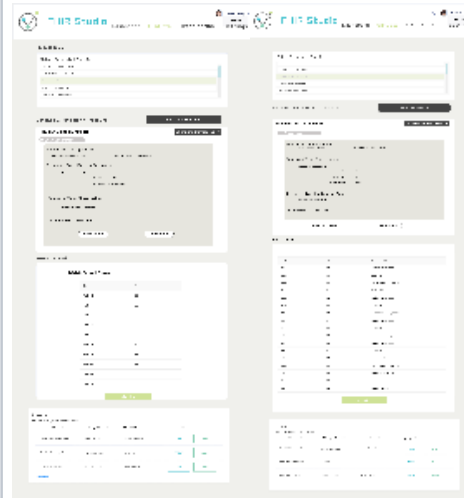

- E8.1 an organization user, I want to view and manage organization so that I can view and manage users under my organization.
- E8.2 an organization user, I want to delete the users under my organization so that I can delete a person's account when they leave the organization.

- E5.1 As a user, I want to generate simulated clinical data so that I can use the data to set up test cases, validate products, test research output, test data processes pipeline, and demonstrate products.
- E5.2 As a user, I want to configure the generated data so that I can obtain the data with the desired feature.

- E7.1 As a user, I want to visualize the simulated data so that I can obtain a more intuitive understanding of the simulated dataset.
- E7.2 As a user, I want to have simulated data based on the trend line I draw so that I can obtain the desired data set easily.
- E4.2 As a user, I want to save my data setting so that I can see my data settings by looking at the data history.
- E4.3 As a user, I want to share the generated data so that My team members can work with the shared data from the data repository.
- E4.5 As a user, I want to have a unique code for my configuration when I press share so that my team member or external user can directly generate the data based on my configuration.

#### Organization Members

Share with organization members

Meilin Zhang (me)

Share with other organization or person

Your share code for this configuration:

QYUNHG1UH786

Press to copy

- E5.3 As a user, I want to staged my data so that I can generate some simple visualization of the dataset.
- E5.4 As a user, I want to push the simulated data into the current production server so that I can validate my product directly.

#### Data Generation Finished

Where you want to store your data

Save to My Data Set

Export to My Device

Save and Export

You Server API:
