Ut	ser Story Map								
User Activities	Manage Account			Simulate Data				FHIR Management	Organization management
User Tasks	Register	Sign in and sign out	Settings	Data Management	Data Generation	Product Validation	Data Visualization	Sendbox Integration	Accounts menagement
Features	Sprint 1   16								
	register an account	sign in	view and edit account information		generate simulated clinical data				view and manage organization accounts
	have unique user id	sign out	manage notifications		configure the generated data				delete accounts under organization
	have a password	reset password			create data for a product demo				
	have password confirmation				set up test cases				
	Newstory								
	Sprint 2   8			recover the data setting	push the simulated data into the	test data analysis pipeline	visualize the simulated data		
					server				
				save data setting	staged data	test research output			
						validate product			
	Sprint 3   6								
	spints   6			share generated data			have simulated data based on the	have all the interfaces needed in the	
							trend line	integration	
				extract the simulated data				embed the FHIR Studio into Validitron Sandbox	
								manage the FHIR Studio	
	Backlog   3
